

Introduction to 2025 MCAS-Alt

Core Concepts: Part A

Fall 2024

Presenters

Debra Hand, MCAS-Alt Trainer

Kevin Froton, Cognia Senior Program Manager

CONTENTS

1. MCAS-Alt Security Requirements
2. Purposes of the MCAS-Alt
3. MCAS-Alt Requirements in Each Grade
4. Required MCAS-Alt Forms
5. Assessing Students with Significant Cognitive Disabilities
6. Assessment Requirements
7. Selecting a Skill for the Measurable Outcome

Housekeeping

- Everyone is in “listen only” mode.
- There will be specific breaks designated for questions. Please hold questions until that time. Still have questions, email mcas@mass.gov
- This presentation is being recorded and will be posted to the DESE YouTube channel.
- If you accidentally close out of Zoom, rejoin using the same link.

Sessions for Introduction to the MCAS-Alt

- **Part A and Part B** (a.m./p.m. session) contain information necessary to compile the MCAS-Alt for ELA-Reading, Language, and Math.
- **Sign up for Separate Sessions:**
 - **ELA–Writing** session focus on specific requirements for the ELA–Writing strand.(Stand-alone session)
 - **Science and Technology/Engineering (STE)** session will provide information for teachers in grades 5, 8, and 9/10 who will conduct the STE alternate assessment.
 - **Civics Assessment (Grade 8 Only)** session focuses on specific requirements for the Civics strand.

1. MCAS-Alt Security Requirements

Your Role in MCAS-Alt Security

- Teachers must ensure that evidence is
 - authentic and portrays student performance accurately
 - not fabricated, replicated, or altered
- Evidence must reflect each student's unique abilities and performance, *regardless* of participation in similar classroom activities.
- DESE may request a fact-finding investigation if irregularities are found or reported.

2. Purposes of the MCAS-Alt

Why Do We Assess Students with Significant Cognitive Disabilities?

- *It's the law!* All students educated with Massachusetts public funds are required to participate in annual statewide assessments. There is NO opting out.
- To include difficult-to-assess students in statewide assessment and accountability—ALL means ALL!
- To determine whether students with significant cognitive disabilities are receiving instruction based on the state's curriculum frameworks
- To use assessments to provide challenging, standard-based instruction based on data and evidence.

3. Overview of the MCAS-Alt Requirements in Each Grade

Required Assessments for ELA (Grades 3–8 and 10)

Grade	English Language Arts	Strands
3-8, 10	<p>One Reading strand <u>and</u> One Language strand</p> <p>Include a data chart and two pieces of evidence for each strand</p> <p>(Include text titles on the data chart for reading strand)</p>	<p>Reading</p> <p>Choose <i>either</i>: Informational <u>OR</u> Literature Text</p> <p>Language</p> <p>Choose from the cluster heading: <i>Vocabulary Acquisition and Use</i></p>

ELA-Writing: Attend a separate presentation on unique Writing requirements.

- Wednesday, October 9, 10:00-11:30 a.m. *or* Tuesday, October 22, 1:00-2:30 p.m.

Required Assessments for Mathematics (Grades 3-8)

Grade	Student must be assessed in the following:	
	Mathematics	Strands/Domains
3-8	<p>Complete two domains in each grade.</p> <p>Include <u>one data chart</u> and <u>two pieces of evidence</u> for <i>each</i> domain.</p>	<p>Grade 3: Measurement and Data <u>and</u> Operations and Algebraic Thinking</p> <p>Grade 4: Number and Operations-Fractions <u>and</u> Operations and Algebraic Thinking</p> <p>Grade 5: Number and Operations-Fractions <u>and</u> Number and Operations Base Ten</p> <p>Grade 6: The Number System <u>and</u> Statistics and Probability</p> <p>Grade 7: Ratios and Proportional Relationships <u>and</u> Geometry</p> <p>Grade 8: Expressions and Equations <u>and</u> Geometry</p>

Required Assessments for Mathematics (Grade 10)

Grade	Must be assessed in the following	
	Mathematics	Conceptual Categories
10	<p>Choose any three conceptual categories (one standard in each)</p> <p>Include <u>one data chart</u> and <u>two pieces of evidence</u> for <i>each</i> conceptual category.</p>	<ul style="list-style-type: none"> • Numbers and Quantity • Algebra • Functions • Geometry • Statistics and Probability

Required Assessments in Science and Technology/Engineering (STE) and Grade 8 Civics

Grades 5, 8, and High School Science and Technology/Engineering (STE)

- Evidence may be collected over two years (7/1/23 to 3/28/25)
- Attend a separate presentation on unique STE requirements

Grade 8 Only Civics

- Attend a separate presentation on Civics requirements.

4. Required MCAS-Alt Forms

Required Elements

**Artistic
Cover**

**Student's
Introduction**

**School
Calendar**

(include any
non-school
days)

**MCAS-Alt
Cover
Sheet**

**Verification
Form**

(signed by
parent or
log of
attempts)

**Photo/Video
Consent
Form***

(if needed)

- * *Consent Form* for photo or video kept on file at school.

Sample Portfolio Cover Sheet

2025 MCAS-Alt

MCAS-ALT COVER SHEET

(This page must appear as the first page of the assessment.)

- 1) Student's Name: **Alex Keaton**
 - 2) State-Assigned Student Identifier (SASID): **1098765432**
 - 3) Student's Grade as reported in the Student Information Management System (SIMS): **05**
 - 4) School, Educational Collaborative, or Program attended by the student:
FT Middle School
- | DISTRICT | SCHOOL |
|--------------------------------------|-------------------|
| 5) District-School Code: 0001 | - 00019999 |
- 6) Address of School or Program:
123 Mallory Lane, Anytown MA 00000
 - 7) Student's sending district, if program is outside the district in which the student lives:
 - 8) Contact Information:
Teacher's Name: **Mr. Nick**
School telephone and email: **nick@anyschool.org**
 - 9) Content area(s) included in this assessment (check all that apply):
 English Language Arts Mathematics Science and Tech/Eng Civics

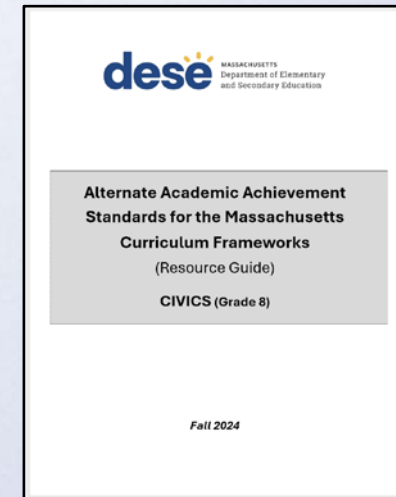

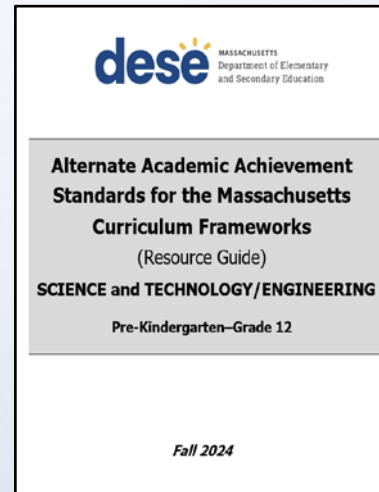

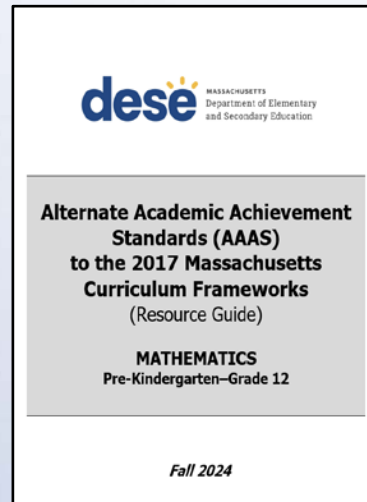

5. MCAS-Alt – Assessing Students with Significant Cognitive Disabilities

Alternate Academic Achievement Standards to the Massachusetts Curriculum Frameworks for Students with Disabilities (“*Resource Guide*”)

- The Resource Guides incorporate curriculum content standards from the *English Language Arts and Literacy; Mathematics; Civics, and Science and Technology/Engineering (STE) Curriculum Frameworks*.
- The Resource Guides are intended as an instructional guide for students with disabilities who have met the criteria for participating in the alternate assessment.

Poll question:

How many of you have seen or used the Resource Guides?

Strand/Domain: A group of standards organized around a central idea, concept, or theme.

Cluster Headings

and ordering for fractions with denominators 2, 3, 4, 5, 6, 8, 10, 12, and 100.

4.NF.A.2

Compare two fractions with different numerators and different denominators, e.g., by creating common denominators or numerators, or by comparing to a benchmark fraction such as $\frac{1}{2}$. Recognize that comparisons are valid only when the two fractions refer to the same whole. Record the results of comparisons with symbols $>$, $=$, or $<$, and justify the conclusions, e.g., by using a visual fraction model.

Standard

Standard: Statement of what *all* students should know and be able to do.

extending previous understandings of operations on whole numbers for fractions with

4.NF.B.3b

Decompose a fraction into a sum of fractions with the same denominator in more than one way, recording each decomposition by an equation. Justify decompositions, e.g., by using drawings or visual fraction models. Examples: $\frac{3}{8} = \frac{1}{8} + \frac{1}{8} + \frac{1}{8}$; $\frac{3}{8} = \frac{1}{8} + \frac{2}{8}$; $2\frac{1}{8} = 1 + 1 + \frac{1}{8} = \frac{8}{8} + \frac{8}{8} + \frac{1}{8}$.

4.NF.B.3c

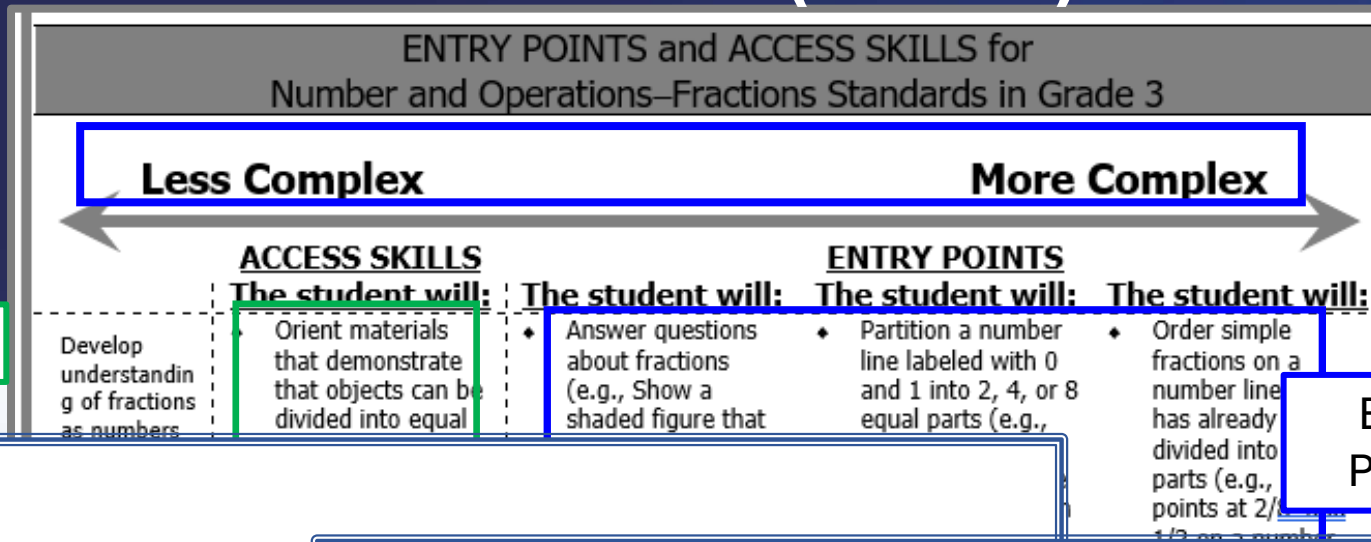

Add and subtract mixed numbers with like denominators, e.g., by replacing each

Cluster: A smaller group of related standards.

4.NF.B.4

Apply and extend previous understandings of multiplication to multiply a fraction by a whole number.

Navigating the Resource Guide (cont'd)

Access Skills

Entry Points

Access Skills: Develop (communication or r addressed during sta activities in the cont Found at the lowest strand/domain.

Entry Points: Outcomes described in the Resource Guide that are based on a learning standard at lower levels of complexity. Shown on a continuum from *More* to *Less Complex*, *entry points* allow teachers to “spiral” to lower levels of complexity based on their students’ needs.

Entry points form the basis of “measurable outcomes” in each portfolio strand.

Sample Standard, Entry Points, and Access Skills

Example of spiraling from the grade-level standard.

Track object as it is added or subtracted from a set

Match visual representations of simple fractions to the fraction itself

Add and subtract numbers one- and two-digit whole numbers

Determine the coordinates of points plotted on a coordinate grid (e.g., from any quadrant)

Standard 6.NS.C.6:
Understand a rational number as a point on the number line. Extend number line diagrams and coordinate axes familiar from previous grades to represent points on the line and in the plane with negative number coordinates.

Access Skills

Entry Points from Resource Guide

Standard as written

← Less Complex

More Complex →

Access Skills

- For students with only **emerging symbolic communication skills** who address early **developmental milestones** (e.g., responding to stimuli, grasping objects, etc.)
- Access skills must be addressed *in the context of a standards-based activity* in the required strand/domain for the student’s grade. For example:
 - ❑ *Student activates a device with a pre-recorded word for classmates during an “antonym naming game.”* (ELA–Language)
 - ❑ *As student releases a block from their grasp, the teacher counts as each block drops into the bin.* (Mathematics–Operations and Algebraic Thinking)

Poll question

- Who thinks their student(s) will use entry points?
- Who thinks their student(s) will use access skills?

6. Assessment Requirements

ELA: Language and Reading

Mathematics

Core Set of Evidence: ELA-Reading, Language, and Mathematics

...Except unique requirements for **ELA-Writing, Civics, and Science and Tech/Eng (STE)**

MCAS-Alt SKILLS SURVEY

MCAS-Alt SKILLS SURVEY

Student's Name: Alex Keaton

Grade: 05

Date of Survey: 9/23/2024

Grade 5 Mathematics

Number and Operations in Base Ten

Using objects, manipulatives, technology, or paper-pencil, student can:		A 0% (unable)	B Up to 25% (rarely)	C Up to 50% (occasionally)	D Up to 75% (more often than not)	E Up to 100% (almost always)
1.	Count by ones to 10.	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>
2.	Represent up to 5 objects with numerals, including 0.	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>
3.	Compose numbers from 1 to 9 to create 10, using objects.	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>
4.	Count by tens to 100.	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>
5.	Count forward beginning from a given number up to 100 (e.g., count on from 23).	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>
6.	Identify "ten more" (or "ten less") than a given two-digit number.	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>
7.	Add and subtract single-digit numbers.	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>
8.	Add and subtract two-digit numbers.	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>
9.	Round a given amount of money to the nearest dollar (e.g., \$2.57 rounds to \$3.00).	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
10.	Round whole three-digit numbers to the nearest 100.	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
11.	Multiply a one-digit number by a two-digit number.	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
12.	Divide a three-digit number by a one-digit number (without remainders).	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

The skills survey is required for each strand of the MCAS-Alt

- Requires pre-testing of each student on a range of skills in the required strands/domains. Complete the survey *prior* to choosing an entry point.
- Teachers should select entry points based on the results of the skills survey.
- Print out and include each completed skills survey just behind the student's *Strand Cover Sheet*. This will count in the overall score.

MCAS-Alt SKILLS SURVEY

This process is intended to:

- Familiarize teachers with the full range of standards and possible entry points
- Help select challenging and appropriate entry points
- Discourage choosing entry points that are too easy
- May result in moving *some* students to other MCAS formats (e.g., standard test with accommodations)

Guidance on Administering the Skills Survey

- Teachers may choose any of the following methods to assess each skill:
 - observations, informal assessments, progress reports, or classroom work;
OR
 - 2-3 **tasks**, based on the examples provided in the survey form; OR
 - **tasks designed by the teacher** accommodated to each student's instructional level and needs.
- Select entry points for the strand based on *or* related to skills that were checked in columns A, B, or C (i.e., the student has not yet learned the skill).

Scoring Rubric for MCAS-Alt SKILLS SURVEY

A	B	C	D	E
Student <u>cannot</u> perform this skill.	Student performs this skill <u>rarely</u> without support.	Student performs this skill <u>intermittently</u> and <u>only occasionally</u> without support.	Student performs this skill <u>more often than not</u> without support.	Student performs this skill <u>almost all of the time</u> without support.

Using Skills Survey Results to Choose an Entry Point or Access Skill

Once the survey has been completed for each required strand/domain, review the results and proceed as follows:

- Select a related or higher-level-of-complexity entry point from the Resource Guide based on any related skill that has been checked in **columns A, B, or C**.
- **Do not select** an entry point for any skills checked in columns **D or E**.
- If column A (“unable to perform the skill”) is checked for all skills, review the criteria of an access skill (i.e., a motor or communication skill).
- If **columns D and/or E** are checked for *most* of the skills in the strand/domain, then the IEP team should consider whether the MCAS-Alt is the “right” assessment for the student in that subject.

A completed MCAS-Alt Skills Survey ***must*** be submitted for each assessed strand.

Insert the completed Skills Survey just after the Strand Cover Sheet in *each* strand.

Sample: MCAS-Alt SKILLS SURVEY

Mathematics—Number and Operations in Base Ten

MCAS-Alt SKILLS SURVEY

Student's Name: **Alex Keaton**

Grade: **05**

Date of Survey: **9/23/2024**

Grade 5 Mathematics

Number and Operations in Base Ten

Using objects, manipulatives, technology, or paper-pencil, student can:		A 0% (unable)	B Up to 25% (rarely)	C Up to 50% (occasionally)	D Up to 75% (more often than not)	E Up to 100% (almost always)
1.	Count by ones to 10.	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input checked="" type="radio"/>

11.	Multiply a one-digit number by a two-digit number.	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
12.	Divide a three-digit number by a one-digit number (without remainders).	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

7. **Selecting a Skill for the Measurable Outcome**

Strand Cover Sheet

2025 MCAS-Alt

STRAND COVER SHEET

(A completed Strand Cover Sheet must be included at the beginning of each strand being submitted.)

- (1) Student's Name: **Alex Keaton**
- (2) Student's grade as reported in the Student Information Management System (SIMS): **05**
- (3) a. Content Area (Subject): **Mathematics**
b. Strand: **Number and Operations in Base Ten**
c. Learning Standard: **5.NBT.B.6 Find whole-number quotients of whole numbers with up to four-digit**

Measurable Outcome: A specific goal chosen by the teacher based on the results of the skills survey. It is either an entry point or access skill in the strand/domain required for assessment in that grade.

A **measurable outcome** identifies the **skill** to be assessed and the **criteria** for mastery.

Evidence in each strand documents the student's performance of the **measurable outcome**.

skill, including augmentative or alternative communication (AAC) system, if used:

Evidence Page Type	My Description
--------------------	----------------

Selecting an Entry Point for the Measurable Outcome

- The selected skill should challenge students without being overwhelming. Use the results of the skills survey as a guide.
 - If **too challenging**, adjust to lower complexity by reviewing entry points in a different column.
 - If a student masters the skill quickly, then the skill is **not challenging enough**.
 - Select a more complex entry point.
- If **challenging and attainable**, the skill is **just right!**

Considerations when Selecting an Entry Point

- **Review the verb linked to the skill**
(e.g., describe, identify, match, etc.)
- **Review the examples provided with many entry points**
(e.g., Functions: if input is 20 and output is 25, what is the rule?)
- **Understand the meaning of pertinent words or concepts in the entry points**
(e.g., attributes, equations, exothermic) Consult with a content expert if unsure.
- **Look for notes** embedded in the Resource Guide.

Unit Fraction:
a fraction with a
numerator of one.

REMEMBER to assess the entry point or access skill you selected.

Optional modifications when an Entry Point includes two or more related skills

If an entry point includes multiple related skills:

Entry Point: *Solve multiplication and division word problems.*

Option 1: Use the entry point “as is” with both skills.

Measurable outcome:

“Student will solve multiplication *and* division word problems with 80% accuracy and 100% independence.”

Brief Description:

“Student solved 6 multiplication *and* division word problems on a worksheet.”

All work samples and data points must document both skills:

“solving multiplication and division word problems” (both skills assessed in the activity).

Evidence must reflect the measurable outcome—assess what you say you will assess!

Optional modifications when an Entry Point includes two or more related skills (cont.)

Option 2: Modify the entry point to address only one of the skills.

Modified Entry Point: *Solve multiplication ~~and division~~ word problems.*

Measurable outcome:

“Student will solve multiplication word problems with 80% accuracy and 100% independence.”

Brief Description:

“Student solved 6 multiplication word problems on a worksheet.”

All **work samples** and **data points** must document “solving multiplication word problems.” **(one skill)**

Questions

POP BACK AT 1:00!

Introduction to 2025 MCAS-Alt

Core Concepts: Part B

Fall 2024

CONTENTS

8. Data Charts and Brief Descriptions
9. Primary Evidence
10. Calculating Accuracy and Independence
11. Self-Evaluation for All Content Areas
12. Important Reminders

8. Data Charts and Brief Descriptions

Purpose of the Brief Descriptions

Brief descriptions document the activity performed by the student.

- **What** skill was assessed?
 - Must reflect the **same** skill (or skills) as the measurable outcome
- **How** did the student demonstrate the skill?
 - What instructional methods, approaches, or materials were used?

NOTE: Generalized Performance (GP) is a scoring area that measures **whether** the student demonstrated the skill using varied instructional approaches.

Brief Descriptions:

Use a Synonymous Verb found in the Measurable Outcome

- **Identify:** Label, name, point
- **Sort:** Categorize, organize, classify
- **Match:** Correspond, same as, similar to, equal to
- **Describe:** Explain, give details, portray, express
- **Compare:** Contrast, list similarities and/or differences, describe characteristics on a list, table, or Venn diagram, distinguish between

Reminder: Identify ≠ describe

Example of a Brief Description

Measurable outcome: Student will represent data from a survey graphically with 80% accuracy and 100% independence.

Brief description: Student displayed data from a class survey, on a bar graph, by coloring in the correct categories.

WHAT

HOW

Include only the skill(s) listed in the measurable outcome in the brief description.

Brief Descriptions for ELA Reading Strand

Alex read "Ben Goes Fishing" and answered comprehension questions related to the story on a worksheet.	Alex answered comprehension questions on the computer program, RazKids, after reading "Go Away, Lily".	After reading "Baby Brother" in his reading group, Alex answered comprehension questions related to the text on a worksheet.	Alex read "Anna and the Mummy" during her speech and language group and then answered questions about the text orally.	On a worksheet, Alex answered comprehension questions after reading "Ian Builds a Snowman".	For homework, Alex read "Ken's Messy Room" and then answered comprehension questions related to the text on a worksheet.	During his speech/language group, Alex read "Anna and the Santa Trap". He then answered questions about the text orally.	After reading "Daddy is Always Working", Alex answered comprehension questions related to the text on the worksheet.
--	--	--	--	---	--	--	--

For ELA–Reading:

- *Each* data point must refer to the **title** of the published text.
- If the **title** is **unclear** if **or** there is **no title** include a small sample of the text.
- A separate list of published titles with corresponding dates may be included.

Strands must be based *either* on **Literature** *or* **Informational text**, not both.

Ideas for including titles and/or copies of texts:

- Open as a Word or PDF and capture a screenshot of the text.
- Scan the text to a flash drive to include in the binder. (most copy machines have a scan function.)
- Print out the text for inclusion in the binder.

Be sure to place the corresponding dates from the data chart on the text copy.

<p>Place dates on each sample</p> <p>Ken's Messy Room</p> <p>Ken's room was a mess! There were toy trucks on the floor. There were books by the door. There were pants on the bed.</p> <p>Ken's dad said, "This room is a pig pen! Clean it now!" He was not happy. Ken got to work.</p> <p>He made his bed. He put his trucks in the toy box. He put his books away. He folded the pants and put them away.</p> <p>Ken's Dad came back. "You did a great job," he said. Ken and his dad were both happy.</p>	<p>Anna and The Santa Trap by Anita N. Amin</p> <p>"We're going to catch Santa!" Anna told her kitten the morning before Christmas. "Every year, I fall asleep and miss Santa. But not this time. I've got the perfect plan! You're going to lead Santa straight to me."</p> <p>Anna held up a small silver bell. It dangled from a red ribbon. Anna fed it around Kitty's neck.</p> <p>Kitty tried to play with the bell. Ding, Ding, the bell jingled.</p> <p>Anna grinned. "When Santa hears that bell, he'll think one of his reindeer got loose and come looking for it. And that bell will wake me up so I'll see Santa!"</p> <p>Excited, Anna and Kitty pranced around the house all day. Finally at bedtime, Anna left cookies and milk for Santa on a table near the Christmas tree. Then, she went to bed.</p> <p>Ding, Ding Anna's eyes flew open. "Kitty?" She peered into the darkness. "Is Santa there?" Ding, Ding, Anna frowned. The jingles were coming from outside on the roof. "How did Kitty get up there?" Anna hustled out of her bedroom. "She was supposed to stay with me." "What's going on?" Mom yawned, stepping out into the hallway in her robe. "Kitty's on the roof," Anna said. "I can hear her bell." Ding, ding. This time the jingle came from Anna's room. "There's Kitty," Mom said as Kitty came out of Anna's room. "She's been in the house all night." "But..." Anna frowned. Then, she froze. "Santa!" Ding, ding. A fall jingle came from outside. Mom's eyes grew wide. "Santa's reindeer!" she whispered. They rushed to the window just in time to see a bright light streak across the sky.</p>
<p>Tyler's Tantrum Story By: Andrew Frinkle</p> <p>Tyler wanted a cookie. Mom would not give him a cookie. Why not? He wanted one more.</p> <p>He already had four cookies. He wanted five cookies. How could he get one more cookie?</p> <p>He cried and screamed. He stomped his feet. He pulled his hair. He tried to bite mommy.</p> <p>He kicked and screamed more. He wanted a cookie! He was so angry. But, he was getting tired.</p> <p>He kicked and cried more. He fell down. Now he was really tired. He did not want a cookie now.</p> <p>Mom hugged him. A hug was better than a cookie. Now he was happy. There were always cookies tomorrow.</p> 	<p>Daddy is Always Working! Story By: Andrew Frinkle</p> <p>Sandy was sad. Her daddy was her favorite person. She liked him a lot! Mom was great, too. Sandy still liked to play with daddy.</p> <p>Daddy was always busy. Daddy was always working. He was in the office. He worked on a computer. He worked all day long.</p> <p>Sometimes, Daddy came out of the office. He came out for breakfast. He came out for lunch. He came out for dinner. He came out for bedtime.</p> <p>Sandy played with daddy before bed. They read books. They played with toys. They played pretend games. They ran around.</p> <p>Sandy ALWAYS wanted to play with daddy.</p> 

<p>Place Dates on Each Sample</p> <p>Ben Goes Fishing</p> <p>Ben and his dad went fishing. Ben took the pole. His dad took some worms.</p> <p>They got on a boat. The boat was in Pine Lake. Ben's dad drove the boat. He knows where to find the fish. Ben liked the boat ride.</p> <p>Ben put a worm on the hook. He put his line in the water. He felt the pole pull. Was it a fish? He reeled it in. He did not get a fish. Ben got an old can.</p> 	<p>Go Away, Lily</p>  <p>When Jack sat down, Lily sat down. Go away, Lily!</p>
<p>Anna and the Mummy by Anita N. Amin</p> <p>Mom told Anna after breakfast, "Let's set up the front porch for fall."</p> <p>"Okay, Kitty can help, too," Anna called her kitten, but Kitty didn't come. "Have you seen Kitty?" Anna asked Mom.</p> <p>"I saw her in your bedroom before breakfast," Mom said.</p> <p>"I'd better go find her," Anna said.</p> <p>"Okay, Moonchild, I'll go get the scarecrows and pumpkins," Mom went to the garage.</p> <p>Anna went to her bedroom. She looked around but didn't see Kitty. "Kitty," Anna called again.</p> <p>Still, Kitty didn't come.</p> <p>Anna checked her closet. No Kitty. She looked behind her door. No Kitty. She looked under her desk. No Kitty.</p> <p>Then, she saw some white yarn poking out from under her bed. "How did that get there?" Anna called. "The yarn kept coming. Anna kept pulling but there was no end to the yarn.</p> <p>Finally, Anna looked under her bed. "Kitty!" She pulled Kitty out from under the bed. Kitty was tangled in the white yarn.</p> <p>"You look just like a mummy!" Anna laughed. "I think that's what you'll be for Halloween."</p>	<p>Ian Builds a Snowman by Anita N. Amin</p> <p>"Snow!" Ian cried as he raced out into his front yard one morning. The fresh snow was knee-deep.</p> <p>His dog, Sir Wags-a-Lot, ran into the snow, too.</p> <p>"Fetch, Sir Wags-a-Lot!" Ian threw a stick.</p> <p>Sir Wags-a-Lot dashed after it.</p> <p>"Hey, let's build a snowman!" Ian's friend, Anna, called from across the street.</p> <p>She joined Ian.</p> <p>Ian and Anna rolled the snow into three big balls and stacked them.</p> <p>"I'll go get some things for the face," Ian ran inside. He got some plums for the eyes, a carrot for the nose, and licorice for the mouth. He came back outside.</p> <p>Anna put a stick in the snowman to make an arm.</p> <p>"Wall!" Ian cried. But it was too late.</p> <p>Sir Wags-a-Lot jumped at the snowman's arms. The snowman fell over.</p> <p>"Oh well," Anna laughed. "You know what that means." She rolled some snow into a small snowball.</p> <p>Zing! It flew past Ian's ears. Ian ducked behind a tree.</p> <p>"It's time for a snowball fight!" Ian laughed.</p>

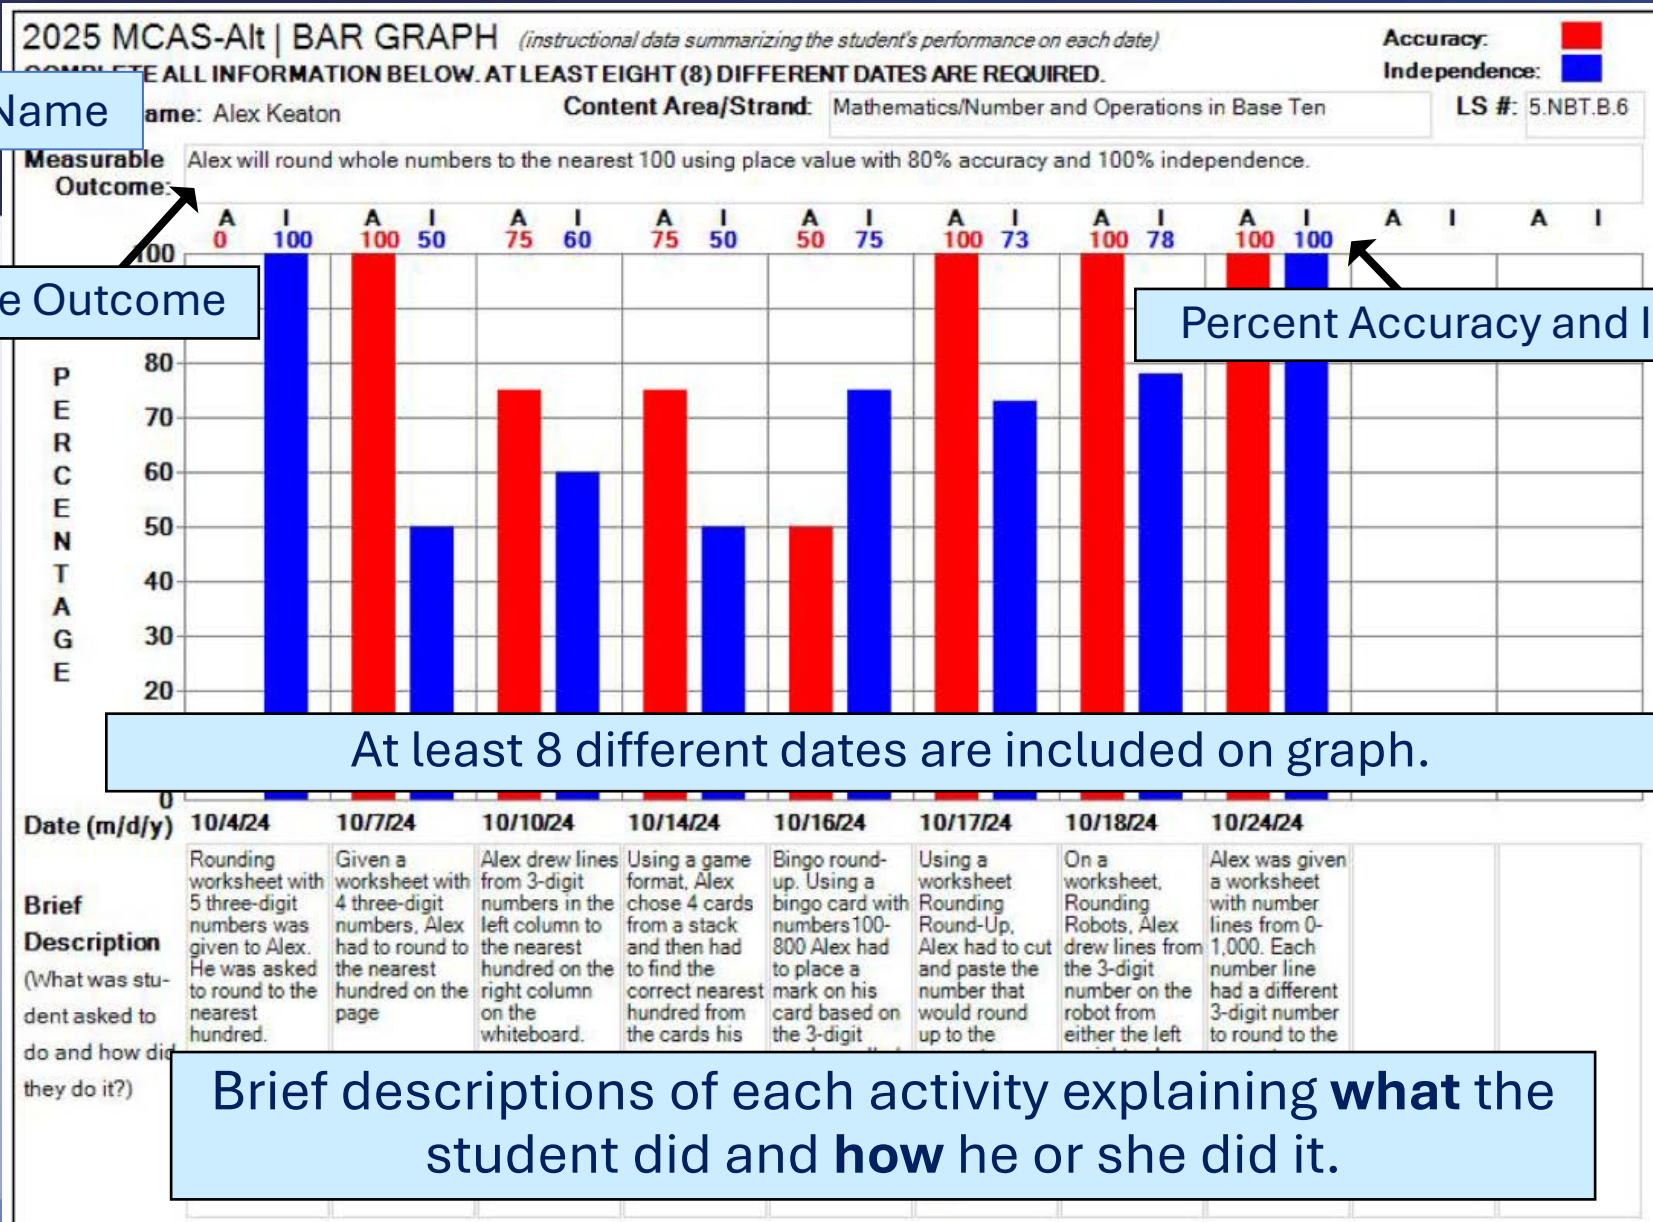

Data Chart is Required for ELA–Reading, Language, and Mathematics

Choice of format: Line Graph, Bar Graph, or Field Data Chart

What to include on each data chart:

- Student's Name
- Learning Standard (at student's grade level)
- Measurable Outcome (skill to be assessed)
- Data points on at least *8 different dates on which school is in session*
- Percent accuracy and independence of responses on each date
- Brief descriptions beneath each date:
 - “**What**” the student was asked to do (based on skill in the measurable outcome),
and
 - “**How**” they did it, reflecting instructional approaches and formats, where possible

Data Chart: Bar Graph

Student Name

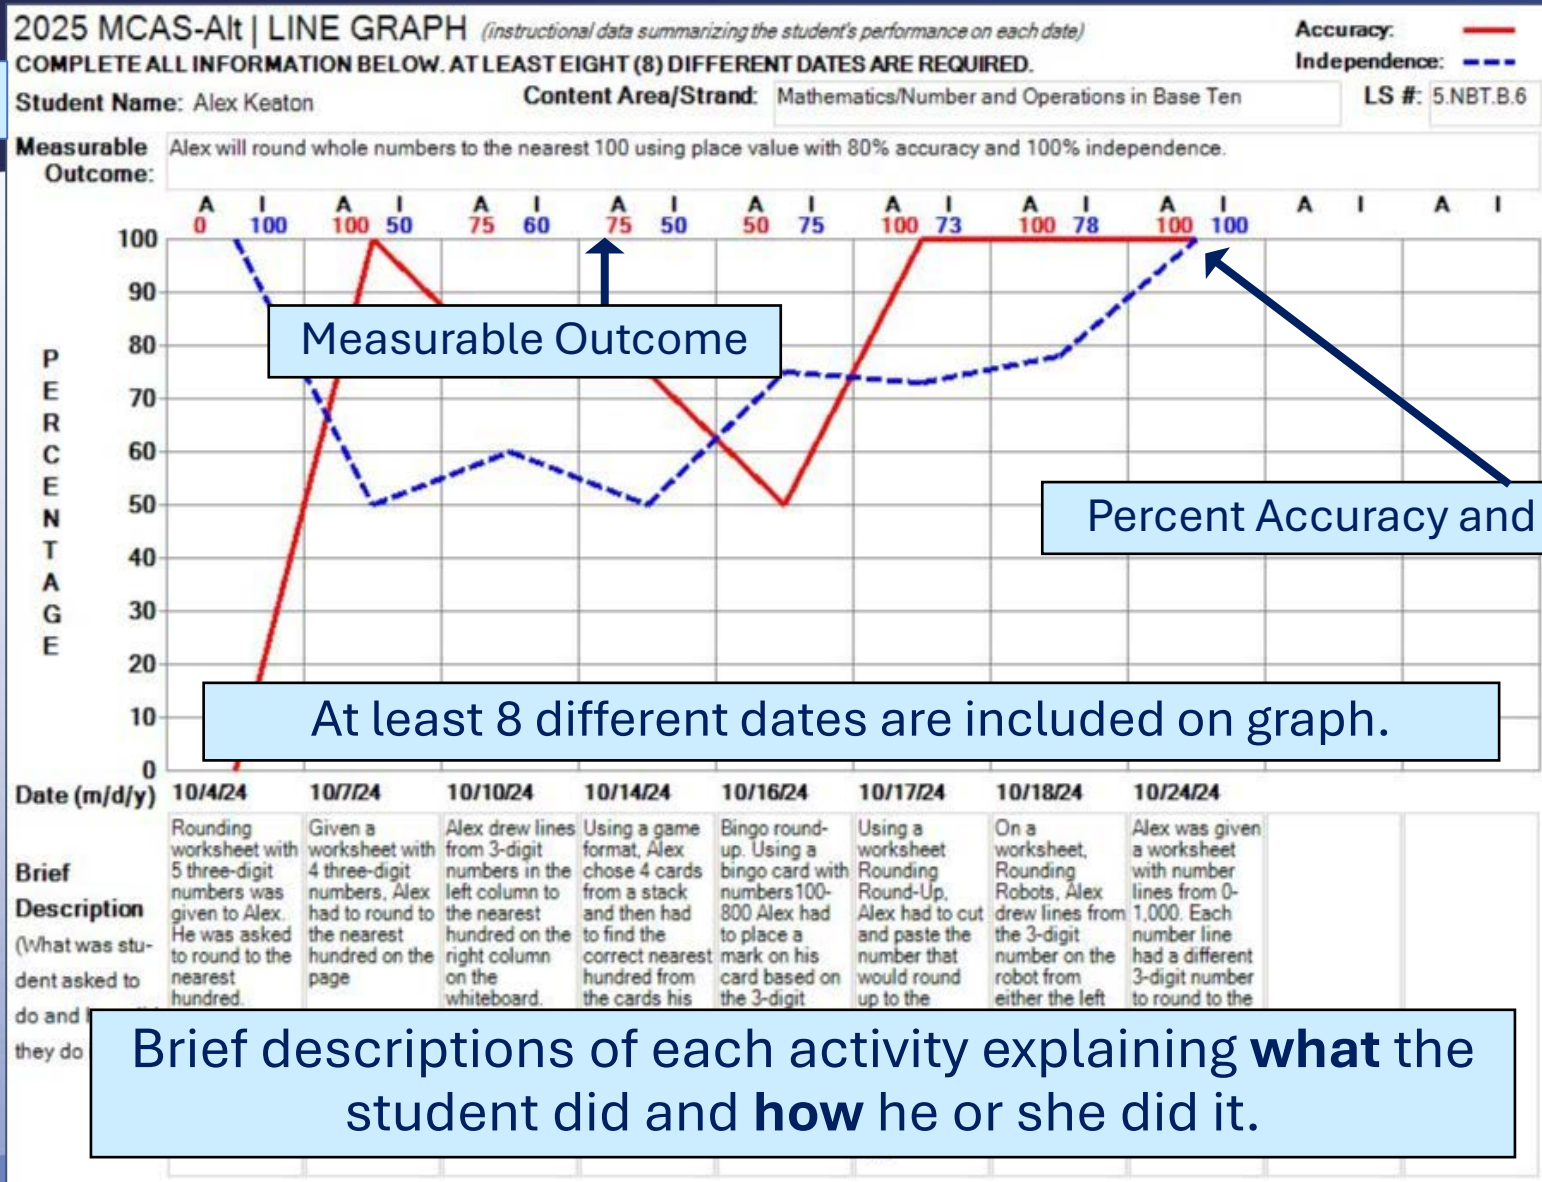

Measurable Outcome

Percent Accuracy and Independence

Brief descriptions of each activity explaining **what** the student did and **how** he or she did it.

Data Chart: Line Graph

Student Name

Data Chart: Field Data Chart

DATA METHOD 1: FIELD DATA CHART
 COMPLETE ALL INFORMATION BELOW.

Student Name: Rosie Riverter

Content Area/Strand: English Language Arts - Language

Learning Standard: L.8.4a Use context (e.g., the overall meaning of a sentence or paragraph; a word's position or function in a sentence) as a clue to the meaning of a word or phrase.

Measurable Outcome: Student will attend visually, aurally, or tactilely to materials related to vocabulary acquisition within 15 seconds with 80% accuracy and 60% independence.

		KEY	
		+	Accurate
		-	Incorrect
		I	Independent
		P	Prompt Used
		(1 or P) Independence	

At least eight (8) different dates are required.

Date (mo/day/yr):	10/4/24	10/7/24	10/10/24	10/14/24	10/16/24	10/17/24	10/18/24	10/19/24	10/24/24	10/25/24

Key to symbols used for data collection

Response-by-response data collection

Which data chart to use?

Bar or Line graphs summarize tasks on each date (e.g., work samples).

Field data charts record multiple responses on each date.

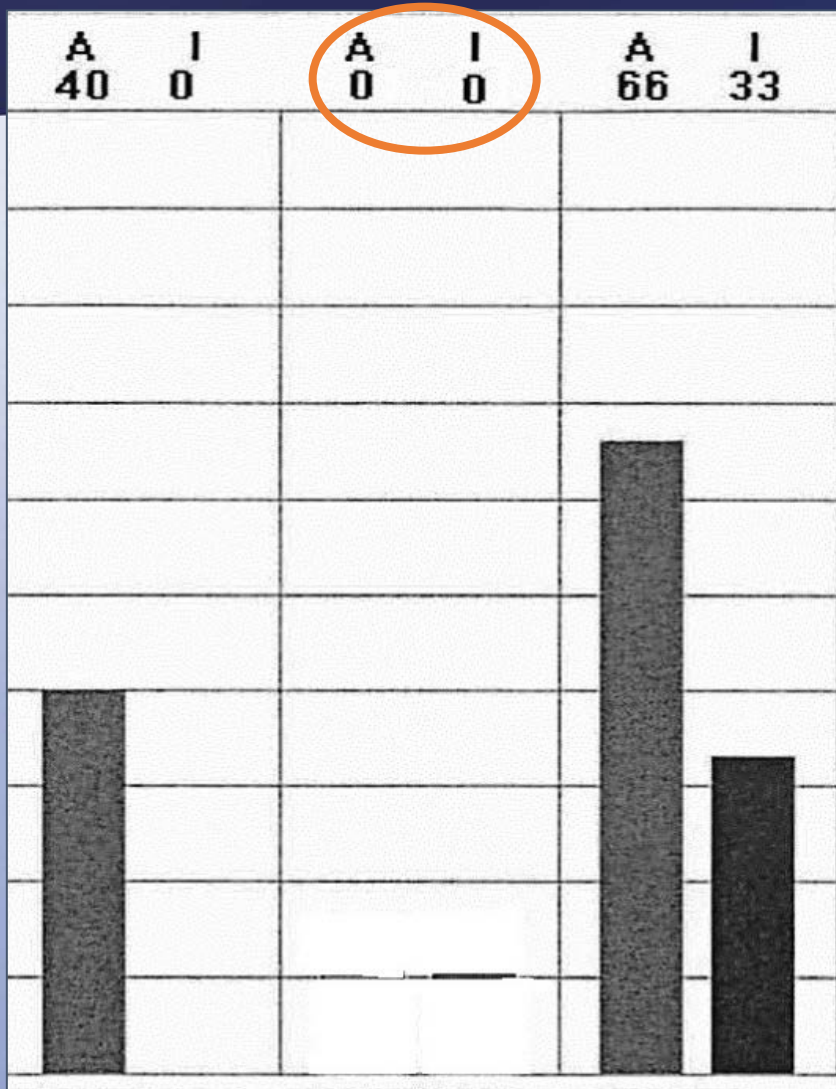

Data Charts May *Not* Start at 80% Accuracy *and* Independence

100% accuracy *and* independence

IMPORTANT: This indicates the student was already able to perform the skill. Data charts that begin at or above 80% in *both* accuracy and independence are **not** scorable.

Data Points may NOT reflect 0% Accuracy AND 0% Independence

- Data points listed as 0 percent for **both** accuracy and independence are *not* considered valid data points.
- They will ***not*** be scored or included in the minimum of eight data points that address the measurable outcome.

Activity:

Are the following brief descriptions acceptable?

- 1. Measurable Outcome:** Larry will describe the central message of a literary text with 80% accuracy and 100% independence. (ELA-Reading)
Brief Description: Larry answered 4 questions about the main idea.
- 2. Measurable Outcome:** Pasquale will identify the value of US coins with 80% accuracy and 100 % independence. (Math-NB)
Brief Description: Pasquale sorted nickels, dimes, pennies, and quarters.
- 3. Measurable Outcome:** Sophia will demonstrate the meaning of a newly-created compound word with 80% accuracy and 100% independence. (ELA-Language)
Brief Description: Sophia put puzzle pieces together to create compound words (butter + fly).
- 4. Measurable Outcome:** Yi will solve one or two-step equations involving multiplication and/or division with 80% accuracy and 100% independence. (Math-Expressions and Equations)
Brief Description: Yi accurately completed 8 out of 10 problems on IXL during morning group with Miss Sue, no prompting was needed, it was a good day.

9. Primary Evidence

Work Sample Description for Evidence #1

2025 MCAS-Alt

WORK SAMPLE DESCRIPTION

(Complete and attach one label to each work sample or write this information directly on each piece. Do not use this label for data charts or videotapes.)

- **Student's Name**
- **Date**
- **% Accuracy**
- **% Independence**

Subject: **Mathematics**

Strand: **Number and Operations in Base Ten**

Learning Standard:

5.NBT.B.6 Find whole-number quotients of whole numbers with up to four-digit dividends and two-digit divisors, using strategies based on place value, the properties of operations, and/or the relationship between multiplication and division. Illustrate and explain the calculation by using equations, rectangular arrays, and/or area models.

Self-Evaluation: (Must be completed by, or scribed at the direction of, the student; evidence of student **choice** must be shown)

Measurable Outcome:

Alex will round whole numbers to the nearest 100 using place value with 80% accuracy and 100% independence.

**Brief description of
the activity:
What and How?**

Work Sample: Primary Evidence #1

Evidence was produced by the student

10/17/24

100% Acc.

2025 MCAS-Alt

WORK SAMPLE DESCRIPTION

(Complete and attach one label to each work sample or write this information directly on each piece. Do not use this label for data charts or videotapes.)

Name: **Alex Keaton**

Date (m/d/y): **10/18/24**

ACCURACY: **100%**

INDEPENDENCE: **78 %**

Subject: **Mathematics**

Strand: **Number and Operations in Base Ten**

Learning Standard:

5.NBT.B.6 Find whole-number quotients of whole numbers with up to four-digit dividends and two-digit divisors, using strategies based on place value, the properties of operations, and/or the relationship between multiplication and division. Illustrate and explain the calculation by using equations, rectangular arrays, and/or area models.

Self-Evaluation: (Must be completed by, or scribed at the direction of, the student; evidence of student **choice** must be shown)

see attached self-eval

Measurable Outcome:

Alex will round whole numbers to the nearest 100 using place value with 80% accuracy and 100% independence.

Briefly describe what the student was asked to do and how he/she did it:

On a worksheet, Rounding Robots, Alex drew lines from the 3-digit number on the robot from either the left or right column to the nearest hundred in the middle column.

Work Sample: Primary Evidence #2

Name: Alex

100% Acc.
78% Ind.
Rounding to the nearest hundred

10/18/21

Rounding Robots

Round the numbers on the robots to the nearest hundred. Draw a line from each robot to the correct battery.

Photographs as Primary Evidence

Entry Point:

“Compare the traits of main characters in a literary text.”

Brief

Description:

Jamal orally identified character traits in "Charlotte's Web." The teacher wrote responses in an oversized Venn diagram.

Name: Jamal

Date: 11/18/24

100% Acc. 67% Ind.

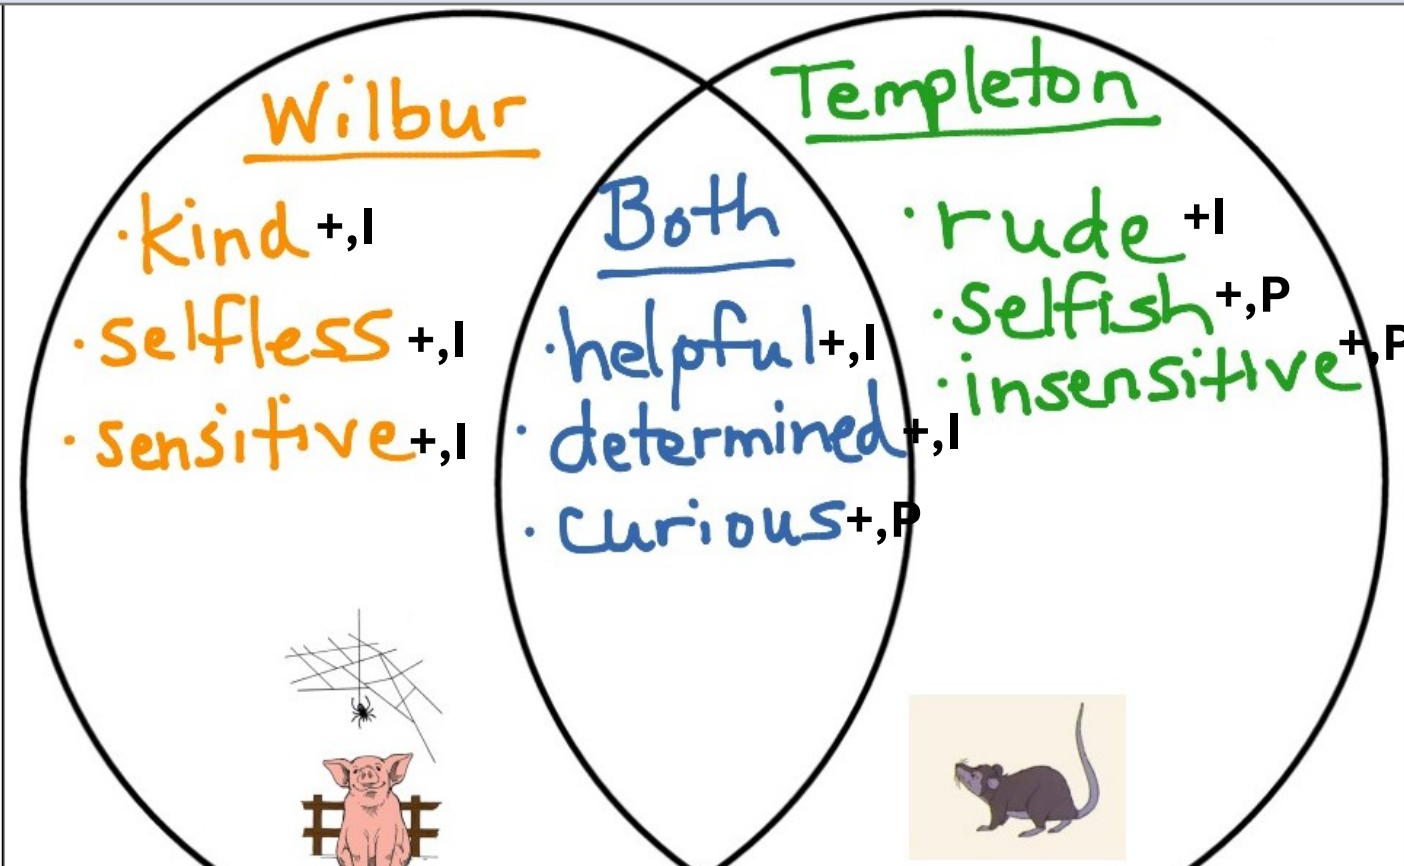

Photo of the whiteboard was included since the product was temporary and too large to include in the binder.

Photos must clearly show:

- the **end product** of instruction;
- OR
- **sequence of steps** leading to the final product.
- **% Acc and Ind** for activity in the photo.

Photographs as Supporting Documentation

Entry Point:

“Student will match an action word to its corresponding picture.”

Does this photo clearly show an image of the final product?

NO!

This photograph is considered **supporting documentation**, not primary evidence.

(Note: This photograph does not show each trial. A teacher-documented work sample would have been better.

Example of a “Teacher-Documented Work Sample”

Grade Level: 7th Grade

Content Area (Subject): Math

Strand: Ratios and Proportional Relationships

Learning Standards: 7.RP.A.2 Recognize and represent proportional relationships between quantities

Measurable Outcome: _____ will turn on technology used to demonstrate ratios and proportional relationships by pressing an access switch to turn the page of a teacher made story on the computer about ratios and proportions with 80% accuracy and 100% independence. _____ will turn on the technology within 15 seconds of a directive.

Brief Description: During a math work session, _____ turned on technology by pressing an access switch to turn the page of a teacher made book on the computer within 15 seconds of a directive. The book taught _____ about ratios and proportional relationships by showing her a series of farm animals using the phrase “for every” to talk about how many of each appendage each animal had. (ex: for every cow there are 4 legs)

Trial Number	Page Number	Did she turn on technology by pressing her switch to activate the reading?	Latency In seconds	What was the ratio on the page?	+/-	I/P
1	1	No	15+ seconds	For every pig there is one tail	-	I
2	1	Yes	4 seconds	For every pig there is one tail	+	I
3	2	Yes	14 seconds	For every sheep there are 2 ears	+	I
4	3	No	15+ seconds	For every cow there are 4 legs	-	I
5	3	No	15+ seconds	For every cow there are 4 legs	-	I
6	3	Yes	10 seconds	For every cow there are 4 legs	+	P
7	4	Yes	3 seconds	For every duck there is 1 beak	+	I
8	5	Yes	1 second	For every goat there are 2 horns	+	I
9	6	Yes	11 seconds	For every horse there are 4 legs	+	I
10						

Accuracy 67% Independence 89%

Describes activities, including materials

Series of trials conducted at the same time

Access skill during standards-based activity

Percentage of Accuracy and Independence

Primary Evidence: “Teacher-Documented Work Sample”

- May be submitted for students who do not produce written work.
- Documents a series of trials conducted on the same day.
- Includes more information than a field data chart.
- Specifically describes the materials/context of the activity.
- Indicates the student’s response (accuracy, independence) to each item/trial using his mode of communication.
- Labeled with name, date, accuracy, independence, and other information as needed.

Digital Evidence

Acceptable digital evidence may include:

- PowerPoint
- Word document
- .pdf files
- .txt files
- .jpg (JPEG)
- Standard video format (typically .mp4, .mv4, or .mov)

If included, submit digital evidence on a **separate** flash drive for each student.

Reminder: Video evidence must be 3 minutes or less and have high audio-visual quality *or* be transcribed in writing.

Questions

10. Calculating Accuracy and Independence

Calculating Accuracy and Independence for Evidence

8 Sentences:

➤ 7 correct responses =
88% ACCURATE

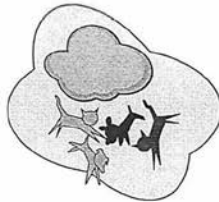

➤ 6 of 8 independent responses =
75% INDEPENDENT

A: 88%
I: 75%

10/13/22 Name: Michael

Using Idioms

Idioms are sayings that have a figurative meaning that is different from its literal, or real, meaning.

Example: It rained cats and dogs yesterday.
The idiom in the example is *rained cats and dogs*.
The figurative meaning is heavy rainfall.
Idioms make sentences more interesting.
It rained cats and dogs yesterday is more interesting than saying "It rained very hard."

Idiom Bank

- ~~cut to the chase~~
- ~~slap on the wrist~~
- ~~under the weather~~
- ~~raincheck~~
- ~~beat over backwards~~
- ~~bull in a china shop~~
- ~~spitting image~~
- ~~head in the clouds~~
- ~~pulling my leg~~
- ~~hit the hay~~

Below are plain sentences. Rewrite each one using an idiom from the idiom bank.

- ✓ 1. Mrs. Campbell tried very hard to help me.
Mrs. Campbell bent over backwards
- ✓ 2. George is walking in a daze.
George is walking head in the clouds
- ✓ 3. Emma is not feeling well.
Emma is feeling under the weather
- ✗ 4. Fred can't go to the movies today; he wants us to ask him another time.
Fred can't go to the movies today
slap on the wrist
- ✓ 5. Wendy looks exactly like her older sister.
Wendy looks like a spitting image
- ✓ 6. I'm tired, so I'm going to sleep.
I'm tired so I am going to hit the hay
- ✓ 7. Are you kidding me?
Are you pulling my leg
- ✓ 8. Will you get to the point!
Will you cut to the chase.

Cues and Prompts versus Accommodations

Accommodations allow a student to respond independently. They are not “prompts” and should not be included in the calculation of independence.

Examples of accommodations:

- Use of a text reader
- Scribe
- Calculator
- Giving a directive to refocus attention: “Pick up your pencil”

Prompts guide a student to a correct response by giving a verbal, visual, physical, or gestural cue. Prompted responses are considered *non-independent* in the calculation of independence:

Examples of prompts:

- eliminating answer choices or emphasizing one choice over another
- guidance on responding: “Go back and write more”

Hand-over-hand assistance is *always* considered a prompted, non-independent response.

Determining Accuracy and Independence

1. Determine the outcome – What are you asking the student to do?
Answering questions, about a book read in class
2. Determine the activity – How will the student perform the skill?
Orally for this activity
3. Divide the activity into “items” – Each opportunity to perform the skill
Five questions will be asked, each question is an opportunity to perform the skill
4. Use a symbol to mark each “item” – For example, +, - (accuracy), I, P (independence)

NOTE:
 Any prompted response = Not independent

Question Number	Accurate (Correct) or Inaccurate (+, -)	Independent or Prompted (I, P)
Question 1	+ (Correct response)	P (Verbal prompt)
Question 2	- (Incorrect response)	P (Verbal prompt)
Question 3	+ (Correct response)	P (Gestural prompt)
Question 4	- (Incorrect response)	P (Verbal prompt)
Question 5	+ (Correct response)	I (No prompt)
Overall Percent	60% accuracy (3 of 5 correct)	20% independence (1 of 5 independent)

11. Self-Evaluation

What is Self-Evaluation?

Evidence of choice-making or reflection by the student about his/her work.

For example, the student:

- Reflected on their performance
 - What did I work on? How did I do? Where do I need help?
- Selected work for their binder – instills ownership in learning
- Chose materials/activities - teacher gives a choice of activities and/or which they would like to do first
- Sets own goal(s) for learning
- Graphed own performance on a grid or table
- Monitored accomplished tasks on a checklist
- Completed a scoring rubric to rate own performance
- Self-corrected mistakes/edited writing

NOTE: Stickers placed on work by the teacher are not considered self-evaluation.

Self-Evaluation

Self-Evaluation

The activity I completed today was called Bounding Robots

I thought the activity was (easy / easy with help / challenging).

I asked for help (only a little / sometimes / many times).

I think that I did (my best work / good work / work which needs improvement).

One new thing I learned was

loop between the hunders

One thing that I liked about this activity was

putting the number no the
Robots

My goal for the next time I work on this skill is

I will do my best work

Examples of Self-Evaluation

Self-Evaluation

1. Today I worked on:

Student used symbols and text to respond to questions about his/her work.

2. I looked at my work.

3. I did my best work.

Teacher-Created Examples

Teacher printed labels with response options; student colored in response to his/her work.

Student used symbols and a bingo marker to respond to simple questions about his/her work.

Examples of Self-Evaluation (cont'd)

Student engagement with a favorite TV show!

NAME: _____ DATE: _____

SELF ASSEMENT: WHO ARE YOU AFTER THIS LESSON??

 **SHELDON**
I UNDERSTAND AND CAN DO IT WITHOUT ANY MISTAKES
"Don't you think if I were wrong I'd know!?!?!?"

 **LEONARD**
I UNDERSTAND AND CAN DO IT WITH A FEW MISTAKES
"Cuz that's how we role in the Shine!"

 **RAJ**
I UNDERSTAND MOST OF THE TIME
"Can you at least tell me what went wrong? Its okay I can take anything!"

 **HOWARD**
I AM STARTING TO UNDERSTAND
"Look what you have created here, its like Nerdvana"

 **PENNY**
I STILL DON'T UNDERSTAND
"I know you think you are explaining yourself, but you're really not"

Teacher-Created Examples

Checklist format

Name _____ Date _____

Self-Evaluation

1. I understood today's lesson.  yes no

2. I asked questions if there was something I did not understand.  yes no

3. I put my best effort into completing this assignment.   yes no

4. The level of this assignment was easy. just right. challenging.

5. I am proud of the quality of my completed assignment.  yes no

12. Important Reminders

MCAS-Alt Submission Deadline

Assessments must be picked up from
your school by UPS on or before
Friday, March 28, 2025.

MCAS-Alt Review Sessions

January and February/March 2025 (*dates and locations TBD*)

- Each series includes:
 - 3 in-person dates
 - 2 virtual dates (register for 1-hour Zoom block)
- Receive feedback and discuss your students' evidence in an informal setting.
- Have your questions answered by MCAS-Alt training specialists.
- Share ideas for collecting high-quality evidence and data.
- Take time to organize and work on your students' assessments.

Final Questions

What's
Next?

ELA-Writing

- Wednesday, October 9, 10:00-11:30 a.m.
or
- Tuesday, October 22, 1:00-2:30 p.m.

Science and Technology/Engineering

- Thursday, October 10, 9:30-11:00 a.m.
or
- Wednesday, October 23, 1:00-2:30 p.m.

Civics

- Thursday, October 10, 1:00-2:30 p.m.
or
- Wednesday, October 23, 9:30-11:00 a.m.

THANK YOU
